

# WINTeQ 15 year warranty & On Line Certification

Thank you for inquiring about the WINTeQ 15 year installation warranty and On Line Certification

Henkel Corporation offers a warranty that sets the standard in the window and door installation industry.

They will provide a written warranty that for a period of fifteen (15) years from the date of installation, units installed by a certified WINTeQ installer will not be defective in materials or workmanship and will be warranted against failure when their WINTeQ Window System, consisting of:

TeQ:Flash;

TeQ:Seal;

TeQ:Foam and  
QUAD Sealant

has been used and when installed in accordance with recommended installation procedures and industry standards. This is an asphalt based system with all components being compatible. The exterior caulking, "Quad" can be applied in wet or dry conditions, is self leveling (no more messy finger licking) and comes in over 3,000 matching colors. (All Eagle window colors are available)

If any component of the WINTeQ Window System should fail, Henkel will pay for the cost of the labor and materials to correct the problems caused by such failure, up to \$ 10,000 per dwelling unit. If your project has ten units, then the policy is covered up to \$ 100,000 usd

Here is a link to the on line website whereby any installer can become certified in the WINTeQ system. This is a partnership with TLS Laboratories and is good anywhere in the world.

[www.winteq.synergycertifications.com](http://www.winteq.synergycertifications.com)

There is a \$ 29.95 course fee for this certification. You can then place your first order and we will have it shipped to you anywhere in the United States. Once you place your first order, Henkel will send you a WINTeQ Starter Kit, a \$ 125.00 value. The Kit includes two cans of TeQ Foam, one can of TeQ cleaner and a TeQ Foam Gun, This will offset the initial cost of the course.

We are using this certification and product line with all of our imported European tilt & turn windows, and have had successful installations in California and Mexico.

To use this certification course

1. Go to this web site: [www.winteqsynergycertifications.com](http://www.winteqsynergycertifications.com)
2. First time users will need to register by clicking on the "register" button on the right side of the page.
3. Log in
4. Click on courses
5. Select "OSI WINTeQ Installations #1"
6. Purchase the course with your credit card. Complete the course and take the test at the end of the course. Once successfully completed, send me a copy of your certification and I will send you registration cards for your various jobs and a warranty certificates for your customers. You send the registration card directly into Henkel, they will take care of the rest.

We have made arrangements with Henkel Corporation to drop ship custom orders of the products in their WINTeQ system directly to your office or job site, on a job by job basis. You will receive it at your designated time. Allow two weeks lead time for most orders. Custom color orders will add another week or so. We will provide a job site estimator so that you can enter the various window and door sizes of your job and automatically configure the final quantity and price of each of the required products. If your installation is being conducted by a Certified WINTeQ Installer, and you use the WINTeQ system, you and your client will qualify for the Henkel 15 year warranty regardless of where your job is located.

This Warranty provides both you and your customer with the peace of mind that comes with an iron clad guarantee from the world's leading manufacturer of window installation caulks, flashing and sealants. This warranty is unequalled in our industry. This is a "win/win" opportunity for all concerned and will prove to be a consistent "deal closure" when offered as part of your window and door sales.

Regards, *Russ Waldrop*
